

SEATS – Site Environmental Awareness Training Scheme

Who should attend?

This course is intended for those who work on a construction site and require basic environmental knowledge. The course will provide candidates with an introduction to environmental issues on construction sites and is designed to meet the basic knowledge that the sub-contract chain are required to prove to major contractors.

Course Aims and Objectives

The purpose of this course is to give delegates knowledge of environmental issues that they will encounter in their normal daily work.

By the end of the course delegates will have gained knowledge and skills in:

- What the environment is and why it is important
- Outline of environmental management systems
- Waste management
- Pollution prevention and water management
- Good neighbour - statutory nuisance, communication
- Archaeology and heritage
- Energy and resources
- Being a responsible contractor

Course Content
